## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Group I (claims 1-11) and the compound of example 26 as the elected species in the reply filed on 6/13/2008 is acknowledged. The traversal is on the ground(s) that the search of the compounds would require no additional search burden where the compound is tied to the method of use. This is not found persuasive because searching the method may require searching different databases, different search terms, and different legal analyses.

The requirement is still deemed proper and is therefore made FINAL.

Because the elected compound appears free of the art, the search was broadened to N-Acetylindole.

**Claims 2-5, 7-21** are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1 and 6** are rejected under 35 U.S.C. 102(b) as being anticipated by Marin (US 4,598,156, see PTO-892 dated 5/22/2008).

Art Unit: **Error! Unknown document property name.**

Marin teaches the compound N-Acetylindole, where R1=H, Q=O, R2 is absent, R3=H, R4=H, R5=H, Y is absent, R6 is H, and X is not present when p=0.
